

Quarterly Performance Review

U Ethical Australian Equities Trust - Retail

Quarterly highlights March 2024

- March saw the equity market's strong run continue as hopes of central banks cutting rates and avoiding recessions provided ongoing tailwinds. This resulted in the ASX 300 Accumulation Index climbing 5.4% in the March quarter.
- The total return for the Trust over the quarter was 9.2%, outperforming the ASX 300 Accumulation Index by 3.7%.
- Stock selection was the key driver of the outperformance. This was also supported by good sector allocation. No Information Technology exposure in the Trust was a headwind in the quarter given the strong interest in the AI thematic driving tech stocks.
- We did not add or remove any companies from the Trust during the period. However, we did reduce holdings in CAR Group, Cochlear and Reliance Worldwide on valuation grounds. We also added to positions in Brambles, Woolworths and QBE amongst others where we see potential valuation upside.

Investment objective

The U Ethical Australian Equities Trust - Retail has been developed for the long-term investor and aims to outperform the benchmark after fees over rolling 5-year periods. It invests primarily in Australian shares as well as up to 10 per cent in fixed interest and cash.

Market commentary

Global equity markets extended their rally in the March quarter with the MSCI World Ex Australia Index (AUD) delivering a total return of 14.0% (partly driven by a weaker Australian dollar). While US inflation has trended lower, expectations for interest rate cuts have been pushed out given stronger economic data.

The US Manufacturing Purchasing Managers' Index (PMI) increased to 50.3 in March ahead of forecasts and up from 47.8 in the prior month. Recent nonfarm payrolls figures have also surprised to the upside. The federal funds target range has remained at 5.25-5.50% since July, although we have seen US 10-year treasury yields rise well above 4% during the quarter.

Australian inflation excluding volatile items declined to 3.9% in February and despite services inflation remaining sticky the trend lower has continued. The Reserve Bank of Australia (RBA) has maintained the cash rate at 4.35% since November, although minutes revealed a shift to more dovish stance. The domestic labour market remains tight with the seasonally adjusted unemployment rate declining slightly to 3.7%.

Corporate earnings were better than expected during the quarter, although stretched equity market valuations leave little room for disappointment. Stronger economic data will likely mean central banks are reluctant to ease monetary policy near-term and we view this as a key driver of equity markets in recent months.

Portfolio commentary

The Trust delivered a total return of 9.2%, outperforming the market by 3.7% due to sector allocation complemented by strong stock selection.

While earnings revisions were generally positive in the quarter, multiple expansions have been responsible for most of the March quarter's gains. With the exception of the pandemic period, the Australian equities market has never been more expensive. The PE of the ASX-300 is now 16.9x, which is 16% above its long-run average. The path for future share price gains from here will likely be driven by sentiment and momentum rather than underlying fundamentals.

During the quarter we increased position sizing in Brambles and QBE as we view these as well-run businesses with good valuation upside. We also added to Woolworths following its disappointing result; the market overreacted to the news causing the share price to fall. As Woolworths is our preferred supermarket exposure this provided an opportunity to add to our position at a favourable price.

We reduced position sizing in Reliance Worldwide, Cochlear and Car Group on their strong respective performance. Meanwhile we also reduced holdings in Amcor where organic earnings growth may be challenging in the near term.

Ethical view

Environmental, Social, and Governance (ESG) refers to the central factors in measuring and tracking the sustainable and societal impact of an investment. These factors include climate risk management and preparedness, human rights considerations, and modern slavery risk.

U Ethical pursues a values-based, risk-adjusted and, where possible for equities, SDG-aligned approach to investing. Our investment process seeks to ensure that our portfolio holdings are aligned with our clients' financial and ethical expectations.

U Ethical's investment process integrates ESG considerations with the aim of minimising investment risk and identifying investment opportunities. Informed by our ethical investment philosophy, we seek out companies producing goods or providing services that appropriately manage their impact on society and the environment according to industry best-practice, industry standards and/or voluntary frameworks.

ESG ratings

ESG Ratings are designed to measure a company's resilience to long-term, industry material environmental, social and governance (ESG) risks. This helps identify industry leaders and laggards according to their exposure to ESG risks and how well they manage those risks relative to peers.
